

BL@THER\$K!TE

Scottish Ale

Ingredients & Stats

Grain & Adjuncts: Golden Promise, Caramel Malt 55L, Special B, Melanoidin, Pale Chocolate Malt
Hops: East Kent Goldings

Yeast: House English Ale Strain
ABV: 5.2%
IBU: 22
SRM: 13

Flavor Description

This easy drinking ale boasts flavors & aromas of caramel, honey, & toffee that go along with a full, sweet mouthfeel. Low hopping rates produce a very clean and sweet finish that pairs well with spicy foods or heavily-seasoned foods along with caramel-like desserts.

Story Behind the Name

Blatherskite is Scottish slang for foolish talk and in a political town like Raleigh we thought there was enough of that to go around!

History of Style

Scotland has a rich & varied brewing history. Since hops were not indigenous to Scotland, brewers were forced to import hops used in their beers, hence the lower hopping rates & maltier beers to preserve profits & productivity for the breweries. The lower gravity versions have remained mostly unchanged since the late 1700s.

Availability: Year-Round; draft, growlers

Awards: 1st Place in Scottish & Irish Ales at NC State Fair

Age-ability: Yes, 3 months

Vegan-friendly: Yes, we don't use animal products in this beer.
